

ADVANCED N(4) FISH OIL FORMULA

Omega 1500 Fish Oil

Fish Oil is the best source of usable Omega-3, but the purity and EPA/DHA levels can vary widely. Do you know what you are using? Trust HPN to bring you the VERY BEST Omega 3 product on the planet.

DIRECTIONS:

Daily Usage: 1 serving of 3 softgels daily, all at once with a meal or spread through multiple meals. Additional softgels may be taken to support individual needs or use as directed by a healthcare advisor.

WHY YOU SHOULD ALWAYS GET N(4)

N(4) provides clinically effective dosages of EPA and DHA in the lowest number of softgels. Our advanced, all-natural, molecular distillation production methods remove all fish taste and impurities. N(4) is third party tested and guaranteed to have no toxins, no heavy metals, and no PCB's. Shown to help with everything from joint to brain health, to protein synthesis for muscle growth and even protecting your heart! But make sure that you are getting the right amount. You need a minimum of 900mg of EPA and 600mg of DHA to get the most out of your Omega Supplementation. Thankfully, N(4) is the perfect source for your everyday needs. Guaranteed!

N(4) FAQs

Where does the raw material for N(4) come from?

We exclusively import our raw material from a protected fishing area in Iceland. This gives us the purest and highest quality starting material on the planet, which directly leads to our ultra platinum grade finished product.

What's the difference between N(4) and other generic fish oil products?

N(4) delivers the proper and necessary amounts of EPA and DHA (Essential Fatty Acids or EFA's for short) to improve lipid profiles, reduce inflammation, and support both brain and cardiovascular health. While many products don't even disclose the amount of EPA and DHA you get, and others are as low as 80mg per serving; N(4) delivers a POWERFUL 1,500mg of EPA and DHA in every serving.

What are the on-going benefits of taking N(4)?

After taking N(4) regularly, users may notice a decrease in muscle soreness and joint pain, a decrease in recovery time from workouts, healthy blood pressure and lipid profile values, a leaner physique and stronger metabolism, and improved overall health.
